

Bio Fulvic Acid

We, M/s. Pushpa J. Shah are engaged in Import & supply Bio Fulvic Acid. The product is tested on various parameters before supplying to clients. Bio Fulvic Acid is highly demanded in agricultural field as it increases the growth of the crop.

Picture	Parameters	Analysis
	Appearance	Yellow Brown Powder
	pH	5 ±0.5
	Solubility	Water Soluble
	Density	0.75 to 0.85
	Origin	Vegetable Origin
	Purity	60%
	Shelf life	3 Years
	Available Packaging	25 kg bags
	Minimum Order Qty:	1 Mt
	Active Ingredients	Fulvic Acid

Functions:

- Scavenges heavy metals
- Enhances seed germination & growth. Improves the development of roots and shoots.
- Bio fulvic is low molecular structure; it acts as natural chelate which enhance the uptake of nutrients.
- Increases plant metabolism of proteins.
- Aids chlorophyll synthesis
- Increases the activity of multiple enzymes
- Enhances cell division and elongation
- Breaks down inorganic substances.
- Detoxifies various pollutants.
- Aids in the creation of fertile new soils
- pH buffering capacity-soluble in acid & alkaline soils.
