

Potassium Humate Flakes

We are importer and supplier of Potassium Humate. We have strategic collaboration with manufacturers in abroad, which empowers us to provide best and uniform quality product round the year. Our product perfectly fits in the parameter of purity and solubility.

Product range:

	Parameters	Super Potassium Humate Shiny Flakes “Grade- A”	Potassium Humate Shiny Flakes “ Grade- B”	Potassium Humate Flakes “ Grade- C”
	Humic	70-65%	60-50%	55-50%
	K ₂ O	10%	10%	8%
	Fulvic	3-5%	2-3%	2-3%
	Solubility	98%	95%	90%

Available Packaging: Paper bags with poly bags inside 25kgs net weight

Uses

- Can be diluted to get desired formulation of different Humic acid Concentration.
- Can be used as base material with products like seaweed, Amino Acids, Chelated Micronutrients, Biofertilizer etc.
- As it is highly soluble and in the form of Shiny Flakes it can be repacked as such for drip & foliar application.
- Liquid concentrate can be coated on other granular products for soil application

Functions of our Product:

- Increases the organic matter of soil and improve soil structure.
- It is a natural Chelate, hence chelates the nutrients in the soil and converts them into plant absorbable form.
- Enhances the root and shoot development/elongation.
- Balances the pH of soil, thus makes the soil suitable for plant growth.
- Improve soil structure by improving the count of Micro flora.
- Help to create crumble form in soil to increase water holding capacity and its aeration.
- Promote the development of chlorophyll, sugars and amino acids in plants and aid in photosynthesis.
- Promote seed germination in short time, greatly increase harvest and fruits quality.
